RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

I was extremely disappointed when I saw this structure being made on our beach. It is nothing like we had come to expect to be built after the works that had been done at the car park further south.

I am not aware of any community consultation for a structure of this nature.

It is everything that shouldn't be built to solve this problem of beach erosion.

As a straight wall like this will lead to scouring and destroy our precious beach. Are boulders to be placed against it to provide the 45 degree wash up for the waves

Also I would like to know what access is being built to allow us onto the beach
