To whom it may concern ,

I wish to lodge my concern re the above application.

Whilst I do believe that the Freshwater SLSC could do with some improvements I do not agree with the design that had been submitted.

It is simply too large and not required. Why would we need such large restaurants when already we have the Diggers , the Harbord Hotel , Pilu and the village restaurants . How do you honestly think they will all operate profitably ?

Where is the parking ?

On any weekend and especially through summer the traffic coming through the village is simply far too busy . Time and time again we see visitors driving carelessly through the village often ignoring the ped crossings .

Freshwater simply does not have the access , car parking or demand for this development in the current format .

Kind regards
