RE: DA2020/0552 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

I really cannot believe the Dam area is challenged further with additional residential units. The building of these units and effect this will have on the dam reserve is seriously concerning. Not just the pollution from a construction site and the extension of the area affected from this process but it is probably also going to lead to the construction of infrastructure needed for access and egress for more inhabitants. So it will probably require further roadwork and construction Potentially even cutting through the dam reserve.

The negative impact this will have on the precious wildlife is once more disregarded and considered expendable. Allowing such a huge structure to be built is simply disappointing and all for the profit of another developer.

The wildlife and precious landscape have brought so many people respite During covid lockdowns. That too, along with the life and existence of the wildlife is crucial.

Sick and tired of this being disregarded.
