Dear M/s Haidari

Re; DA 2020/0552 - 181 Allambie Heights Road, ALLAMBIE HEIGHTS, NSW, 2100

Please accept my considered and strongest OBJECTION to DA 2020/0552 - 181 Allambie Heights Road, Allambie Heights, NSW, 2100.

I submit the following criteria in support of my concerns and objections.

As a WW2 veteran and RSL member with a long association with Manly Warringah War Memorial State Park I find this proposal conflicts and desecrates the sacred memory embodied in it's dedication "IN MEMORY TO ALL WHO GAVE THEIR LIVES , SERVED OR ARE SERVING IN THE AUSTRALIAN ARMED FORCES, CIVILIAN SUPPORT SERVICES AND THOSE WHO ASPIRE FOR WORLD PEACE."...This distinctive War Memorial - unequally in all Australia - embraces the total park area including waterways, military heritage, Aboriginal history and a wealth of native fauna and flora...I would be failing my departed comrades if I did not do all possible to uphold and defend the integrity and sanctity their last memorial resting place.

I wish to make clear my comments are in no way directed against " aged care facilities ", it is this proposal's placement adjacent to MWWMSPP, it's detrimental impacts and their consequences presently and into the future to which I object.

The scale of this proposal will inevitably create both storm and sub surface water impacts on the headwaters of Curl Curl Creek and ultimately the dam water to the detriment of the land and water ecology and ancient Galaxia Climbing fish.

The keeping of domestic pets - cats in particular, possible, the scourge of feral cat populations in the Park - - is a serious issue..., with Australia foremost in world wildlife extinction, where even if a condition were placed by Council, the policing and management over time is unrealistic.

Whether or not AZP would be a requirement, scientists inform us of the certainty of extremes of weather in particular heat waves ( bush fires ) and flooding to name a few....there would be demands for APZ for the occupants safety, another reason this unsuitable, unsafe and inappropriate DA fails to address.

The loss of 85 native trees with vital habitat is a serious issue, just replacing with 130 trees fails the " natural habitat test ie; the greatest cause of wildlife extinction is habitat loss "

This proposal would be seen from a number of Park positions diminishing the ambience and viewing amenity...whilst MWWMSPP is for all to respectfully enjoy, by it's very sacred role it is a place for REFLECTION, CONTEMPLATION and aspiring for PEACE....The fact many hundreds - on occasion - honour ANZAC and REMEMBRANCE DAY Commemorations reflects the Honourable Place it is held in society...this development would have a degrading impact ie; it's sacred integrity diminished by unworthy gain.

This proposal would be in part on Crown Land that has requirements for Public Use....clearly, this is private use regardless.

That the applicant indicates the buying of BIO BANKIN CREDITS flies in the face of their claims of improving the environment. as reported in the press.

The added harm to threatened fauna species eg; Climbing Glaxia fish, Eastern Pygmy Possum, Powerful Owl, Grey Headed Flying Fox, Little Bent Winged Bat and other species is important to the ecological wellbeing to all who recognise the interconnectedness of nature, and humanity's part it plays.

It is exactly a century since this distinctly special MWWMSP ( MWMP ) was declared a War Memorial To The Fallen And Those Who Served Their Country And It's People In Time Of Peril .....LEST WE FORGET.

Thank you for your consideration.

Raymond Cox... ex RAAF, Merchant Navy.
