Subject: Complaint about Proposed Development DA2020/0341

We are submitting our complaint regarding proposed Development Application DA2020/0341
Lot 2413 DP 752038
87 Blackbutts road FRENCHS FOREST
Construction of seniors housing

Our complaint is regarding the height of the development and the window positioning of the 3 units in this development.

We reside at 83 Blackbutts Road, next door on the eastern side to this property.

The height of the development with windows facing east toward us will extremely impact on our living area and backyard privacy as we have an entertainment area and pool.

After looking at the proposed plans of this two storey development we note that all windows will directly look into our living area and backyard and therefore we will have no privacy. The height of the development will severely impact the amount of natural light we will lose to our living area and backyard in the afternoon.

This is deeply concerning to us as is our right to preserve our privacy.

We would appreciate this development not proceed until there has been considerate acknowledgement of this complaint and an alternative solution has been made.
