RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

I am strongly opposed to the installation of a mobile phone tower at Fisher Park.

This is totally unnecessary as phone reception is strong at the park thanks to the existing towers at Winbourne Industrial Estate and 224 Headland Rd which are less than 500m away.

This tower will emit electromagnetic radiation which over time causes cancer and is absorbed by children at a faster rate than adults. This tower will be close to North Curl Curl School and the recreational facilities used by thousands of children for weekend sporting events. The installation of this tower will increase the exposure of everyone who uses the park or lives near to it or goes to school by it as well as the wildlife which inhabit the reserve.

The tower is not needed and should not be approved. A similar proposal was rejected a few years ago and the situation has not changed.
