Officer comments

Waste Management Updated Assessment (Amended master plans received 4 May 2021)

Proposal is approved with conditions

Waste Management Assessment.

Recommendation - Refusal

Specifically:

1) The bin storage is too small to contain the required number of bins.

It is unacceptable to double/triple stack the bins.

Each row of bins must be accessible by an aisle a minimum of 1 metre wide.

A simple redesign of the bin storage room/s in the current location would resolve this issue.

2) The use of bi-fold doors to screen the bins from view.

It is suggested that these type of doors not be used in this application.

Previous experience with these doors shows that the floor track very quickly fills with debris causing the doors to jamb.

Also depending on the type of floor track used impact damage by the bin wheels may render the doors unusable in a short space of time.

The proposal is therefore supported.
