To Whom It May Concern

Please accept the following submission regarding the above listed DA. I was only made aware of this application at the eleventh hour and was unable to make my submission due to an outage.

I am a resident boarding Allenby Reserve and wish to express my concerned about the proposed application for development on crown land based on the following:

1. lack of community consultation
2. loss of natural bushland which is a corridor for wildlife
3. destroying bush for buildings
4. increasing noise and pollution with increased people and traffic
5. overcrowding an already busy area
6. lack of improved infrastructure to cater for expansion
7. detonation of roads and services
8. damage to the nearby creek with run-off and pollution.
9. upsetting nature's balance by allowing oversized development

Council needs to resist this application and destruction of bush as we LIVE in a unique part of the world which needs preservation for now and the future.

Thank you for attention in this matter.

Yours sincerely
Wayne Stevenson
