Statement of modification

To whom it may concern,

We propose that condition number 17 of the DA2019/1089 to be removed from the project. The original proposal was amended during the assessment process to provide additional landscaped areas and no longer met the OSD triggers. This condition was then missed not removed during the application process.

We have the relevant hydraulic engineers report to back this evidence up regarding the appropriate landscaped areas to allow for natural water runoff.

Regards

Craig Archer
