**RE: DA2020/0393 - 28 Lockwood Avenue BELROSE NSW 2085**

I do not believe that the traffic conditions on Glen St have been properly considered in this application. Whilst it is quieter now due to COVID when it returns to normal there is not enough space on Glen St for all of the traffic and parking including buses - and this development will significantly increase the number of cars moving along that road. In addition to that the type of development being proposed does not suit the area and is still over the height restriction. Please reject the current submission based on the above.
