RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

After traveling the world surfing for more than 50 years, I am yet to see a successful seawall that prevents, or minimises loss of beach assets. Worst of all are vertical walls! Any walls along Collaroy South Narrabeen will result in even more degradation of the public space into the future. Sand Nourishment is the only option, or, buy-back and return to natural space. Any wall development should be fully disclosed and vetted by the public prior to works. To be honest, these walls are madness and will destroy public beach to the north. I strongly object to these works!
