RE: Mod2019/0547 - 22 Jubilee Avenue WARRIEWOOD NSW 2102

Please note that I do have a stall that attends this market so not a totally objective person. As a stall holder though the extra hour to setup in the morning would be great. It would allow a far more relaxed setup period which would probably mean a far quieter setup. This is because there would be less need for rushed movements, vocalized directions and the extra setup time would mean there are less cars and people setting up per hour. This latter point would create less noise density (i.e. 50 people setting up in 30 min is more noisy then the same people setting up over 90 minutes as not all are setting up at the same time). This would actually be beneficial to the local residents

I hope the council looks favorably on the modification submission.
