RE: DA2024/1249 - 0 East Esplanade MANLY NSW 2095

The plan provides for ground floor toilets for easy access by ferry patrons. There is no provision for public toilets on the East Esplanade side of the development. What is required is a visible public toilet block at ground level on the East Esplanade side of the development to help cope with the demand of drinkers from the current facility, the new proposed facility and from the approved drinking area on East Esplanade Reserve. Without a visible and accessible facility people revert to public urination. Council needs to plan around this issue.
