**RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101**

The current plans for the sea wall along Collaroy/Narrabeen beach are extremely harmful to the beach, sea life, surf breaks, and heart breaking for community members, a lot of whom have not been made aware of the plans.

The vast majority of people I speak to about the plans (who are all local to the area) are completely unaware of the development and are horrified to see the results of the construction so far. All works should cease completely until the community has been fully briefed.

The design of the Seawall itself fails to serve the beach and instead serves only private properties. Vertical concrete seawalls have been proven to be far more damaging to beach processes than alternative armouring methods.

The current plans for the Seawall will permanently affect our beach and our communities relationship to it. Please reconsider the current plans and share all future plans with the community whose lives revolve around the beach and ocean.
