

Natural Environment Referral Response - Coastal

Application Number:	DA2019/0084
Responsible Officer	Penny Wood
Land to be developed (Address):	Lot A DP 308474 , 22 Marine Parade AVALON BEACH NSW 2107

Reasons for referral

This application seeks consent for land located within the Coastal Zone.

And as such, Council's Natural Environment Unit officers are required to consider the likely impacts on drainage regimes.

Officer comments

Coastal Hazards

From a coastal hazards perspective the site has not been mapped in Pittwater LEP 2014 as affected by beach erosion, coastal inundation or coastal cliff/slope instability, so the requirements of the Coastline Risk Management Policy for Development in Pittwater and the associated coastal hazard controls in P21 DCP are not triggered.

State Environmental Planning Policy (Coastal Management) 2018 12 Development on land within the coastal vulnerability area

Development consent must not be granted to development on land that is within the area identified as "coastal vulnerability area" on the Coastal Vulnerability Area Map unless the consent authority is satisfied that:

- (a) *if the proposed development comprises the erection of a building or works—the building or works are engineered to withstand current and projected coastal hazards for the design life of the building or works, and*
- (b) *the proposed development:*
 - (i) *is not likely to alter coastal processes to the detriment of the natural environment or other land, and*
 - (ii) *is not likely to reduce the public amenity, access to and use of any beach, foreshore, rock platform or headland adjacent to the proposed development, and*
 - (iii) *incorporates appropriate measures to manage risk to life and public safety from coastal hazards, and*
- (c) *measures are in place to ensure that there are appropriate responses to, and management of, anticipated coastal processes and current and future coastal hazards.*

Comment:

At the commencement of State Environmental Planning Policy (Coastal Management) 2018 (CM SEPP) no Coastal Vulnerability Area Map was adopted and therefore no coastal vulnerability area has been identified. In regard to clause 15 of the CM SEPP the proposed development is unlikely to cause increased risk of coastal hazards on the subject land or other land.

As such, it is considered that the application complies with the requirements of State Environmental Planning Policy (Coastal Management) 2018 as they relate to development on land identified as a coastal vulnerability area or land within the coastal zone that may be affected by coastal hazards.
