RE: Mod2020/0458 - 2 Macpherson Street WARRIEWOOD NSW 2102

My understanding is that the modification is to reduce the Section 94 contributions to offset the cost, to the developer, of the creekline corridor works. The developer would have needed to complete those works in order to progress the development, not to provide a public benefit nor to save Council from undertaking the work. This modification application is a thinly veiled attempt to cheat Council and the residents of Warriewood Valley of the expected and justified contribution for the site. Regards Kay
