**Subject:** Re. The development of 27-29 Tasman street Avalon

To whom it may concern. Does this development suit the surrounding houses and general feel of the area? Is this a sensitive development that complements the area does and will this development add to the general quality of life for those already living in the area? Does this development show or demonstrate any environmental concerns.? Does and will it enhance the beauty of the general locale?. This development for me is. Insensitive, over developed in regards to I. The apartments are ugly and unattractive. The additional traffic in this area will be greatly affected. The noise, the number of cars. The number of residents. This development doesn't sit well. They will pull out every tree like all developers do. They will build these ugly apartments there are too many . I do not believe this development will enhance anyone's quality of life here. Streets are narrow. Parking spaces are a real concern. These might be novice developers because it's an ugly development. Inappropriate for this area. Council should in my rationale reject this application as unsuitable. Louise Samuels
