Subject: Objection to DA2020/1233

To whom it may concern,

I'd like to submit my objections for **Application Number: DA2020/1233** on several grounds.

The grass proposed for the Bowling Green is surrounded by aged residents' apartments; some of these are on ground level and only a few meters from the proposed public Bowling Green. My aging parents reside in these apartments and I believe that there is a safety issue for my parents and all the other residents if a Bowling Green were to be constructed. Encouraging public access will greatly reduce residents' security, and as there are many residents that reside alone, the security for these residents would be greatly compromised by the number of people that would be attracted to the Bowling Green.

In addition, the patch of grass proposed for the Bowling Green is the only green space available to the residents. Turning it over to the public at large will bring the green area below the required 10 m² per resident. Furthermore, Harbord Bowling Club, Manly Bowling Club and Calabria Bowling Club already exist and are close by and by taking members away from them is not serving the community. It also should be noted that there will be increased noise pollution from the construction of the Bowling Green, and from the increased numbers of the public attracted to the Bowling Green, and this will impact the aging residents quality of life.

To summarise, for the reasons of safety, green space, noise pollution and serving the community, I implore you to reject this DA.

Your sincerely,

Danya Maguire
