### Officer comments

The proposed site is mapped as Biodiversity under Pittwater LEP, and P21 DCP B4.17 Pittwater Spotted Gum Forest EEC also applies. The proposed development will require the removal of one palm tree that is not characteristic of the endangered community, and is located in the area of least impact on PSGF and or core bushland and there will be no significant net loss of PSGF vegetation. All other trees are to remain, and the project will not result in a significant impact to the environment.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.
