RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

There definitely needs to be an entry / exit point to Forest Way preferably with traffic lights as part of the redevelopment of Forestway Shopping Centre. The residential back streets will not be able to cope with triple amount of traffic if this is not the case. What about emergency services - Police, Ambulance and Fire Brigade - they will be impacted greatly and in any life threatening situation may be hindered which is not ideal and would not reflect favourably on Northern Beaches Council. Limited residential parking is already a major issue and it is near impossible for two cars to pass each other without one car having to pull over to the side - so what is going to happen when a higher volume of traffic and trucks have to use these roads? It will be dangerous for all road users, pedestrians, cyclists, school children. Please reconsider this decision for health, safety and well being of all the community.
