DISCLAIMER
 These areas are schematic only and subject to council and other requisite approval. Areas are not to be used for marketing purposes.
 This scheme has been prepared generally within the bounds of the current site dimensions however is subject to detailed discussion with council, hence may be subject to change once advice is received.

- (g) car parking to meet any requirements of the consent authority (including access to that car parking), and
- (h) any space used for the loading or unloading of goods (including access to it), and
- (i) terraces and balconies with outer walls less than 1.4 metres high, and
- (j) voids above a floor at the level of a storey or storey above.

Overall Car Parking Calculation			
Type	Rate	Req.	Prop.
Residential**	DCP Rates	77	77
Retail*	RMS Rates	90	93
Gym	RMS Rates	20	23
Total Required		187	
Total Proposed		193	

*Retail parking rates based on regression formula.
 **Proposed residential parking includes 5 adaptable spaces.
 **Proposed retail parking includes 4 adaptable spaces.

Opportunities:

- Amenities**
 The site has great amenities in the immediate vicinity including:
- Series of mature trees located on the site.
 - Public parks
 - Shopping Centre
 - New Cultural Hub on Glen Street

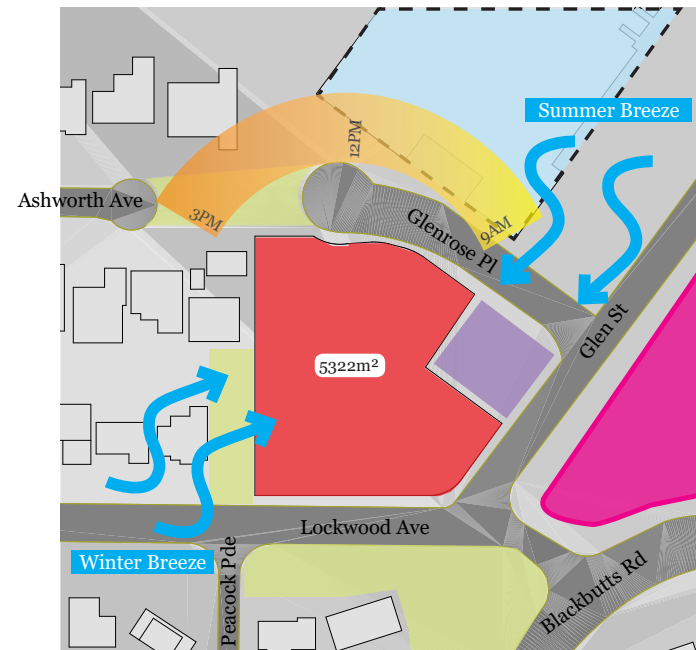

Opportunities:

- Servicing/ 3 Street frontages**
 28 Lockwood Avenue is surrounded by 3 streets and parklands providing fantastic opportunity for servicing, access and building separation

Constraints:

Acoustics/Traffic/Existing Vegetatio
 The long operating hours of Glenrose Village Shopping Centre and Caltex petrol station, along with the population they service, results in high vehicle and pedestrian traffic. Acoustic treatment will need to be considered in the future design for residential occupants along that interface.

Opportunities:

Lot Size
 The subject site has a large site area of 5322m² that suits large scale development. This will add to the much needed dwellings in the area and help to meet future housing demand.
 Much of the surrounding area comprise of small lots, developed sites or strata subdivided properties. Therefore this location and site provides a fantastic opportunity for development.

← Vehicular Access
 — Street Frontages
 — Park Frontages

■ Site
 □ Glenrose Village Shopping Centre
 ■ New Cultural Hub
 ■ Parklands
 ■ Caltex

Planting schedule

Symbol	Botanical name	Common name	Cont. size	Staking	Mature height	No req.
Canopy trees						
ANO	Anacardium occidentale	Sydney Red Gum (large native tree. Shining bark colour)	45Lt	3x50x50x1800	16-25.0M	2
BAS	Banksia serrata	Old Man Banksia (Small native. Gnarled trunk & serrated leaves)	75Lt	3x50x50x1800	4-6.0M	2
CAG	Casuarina glauca	Swamp She-Oak (Med native tree)	45Lt	3x50x50x1800	18-13.0M	5
ER	Elaeocarpus reticulatus	Blueberry Ash (indigenous small tree)	45Lt	3x50x50x1800	6-8.0M	6
GLO	Glochidion ferdinandi	Cheese Tree (indigenous medium tree)	75Lt	3x50x50x1800	8-10.0M	1
LTF	Litsea cordata	Upright Tulip Tree (swell-throated tree)	75Lt	3x50x50x1800	10-15.0M	2
PYR	Pyrus ussuriensis	Manchurian Pear (medium deciduous tree)	75Lt	2x50x50x1800	9-12.0M	1
SYL	Syzygium leuhamni	Small Leaved Lilly Pilly (native screen tree)	75Lt	3x38x38x1800	8-10.0M	10
Shrubs / small feature trees						
ER	Erigeron annuus	Pink Wax Flower (flowering native shrub)	200mm	nil	2.0M	2
SPP	Syzygium 'Superior'	Superior Lilly Pilly (flowering screen plant. Can be hedged)	200mm	hedged to req height	1.6-2.8M	14
Ferns / Palms / Succulents / ornamental bamboos						
AGV	Agave attenuata	Century plant (striking spiky leaved succulent)	200mm	nil	0.5M	12
ARC	Archontophoenix cunninghamiana	Bangalow Palm (Tropical style tall palm)	200mm	wire guys	8-12M	2
BGU	Bambusa guangxiensis	Dwarf Chinese Bamboo (ornamental bamboo can be hedged)	200mm	nil	2-3.5M	12
CAA	Cyathea australis	Tree Fern (Native tree fern)	300mm	nil	2-4.0M	10
CYR	Cycas revolutum	Sago Palm (striking native low palm like)	300mm	nil	1-1.2M	5
DA	Dicksonia antarctica	Soft Tree Fern (shade tolerant tree fern)	300mm	nil	4.0M	4
DRD	Draecena draco	Dragon Tree (striking feature plant)	semi adv	nil	2.5-3.5M	1
LAV	Livistona australis	Cabbage Palm (tall indigenous palm)	semi adv	wire guys	8-12.0M	5
Groundcovers/Climbers						
HVI	Hardenbergia violacea	Native sarsaparilla (native groundcover)	200mm	nil	2.0M	50
PJ	Pandorea jasminoides	Boxer Plant (native climbing/cascading groundcover)	200mm	wire supports on fence	2.5M	10
TJA	Trachelospermum asiaticum	Flatmat Star Jasmine (FTO1 Ozbreed hybrid groundcover)	200mm	nil	0.2M	8
Ornamental grasses/strappy leaved plants						
CM	Civeta miniata	Kaffir Lily (shade tolerant groundcover)	200mm	nil	0.5M	28
CRP	Crinum pedunculatum	Swamp Lily (native mass planted groundcover)	200mm	nil	0.5-0.7	22
DIC	Dianella caerulea	Blue Flax Lily (native grass like plant)	100mm	nil	0.4M	80
LIM	Liriope Evergreen Giant	Turf Lily (shade tolerant groundcover)	150mm	nil	0.4M	98
LOT	Lomandra 'Tanika'	Dwarf Mat Rush (native mass planted groundcover)	150mm	nil	0.4M	30

Planting schedule species to be sourced from local nurseries supplying plants of local provenance wherever possible. Landscape contractor is to check plant numbers on plan against the schedule prior to submitting tender price. Contact landscape architect if any number discrepancies are found. Council compliance controls require that any substitution of species variety or container size MUST be confirmed with landscape architect to ensure a compliance certificate can be issued that meets the specific development consent conditions of the project.

Irrigation notes

Automatic drip line watering system to be selected. To extend to all garden areas nominated on the hatched areas on sheet 3 and is to include all raised planter boxes over slab structures. Water supply tap hosecocks to each isolated planterbox for separate irrigation lines with battery timers. (To be coordinated with Hydraulic Engineer's details). Drip line supply system only to be incorporated. Contractor is to provide an irrigation design to meet the following requirements.

Generally: Supply an automatic drip line irrigation system. To include all piping to solenoids either PVC lines and/or class 12 pressure pipe or low density, rubber modified polypropylene replication as required to provide water supply to the nominated areas. To be coordinated with Hydraulic Engineer's plans. To include all bands, junctions, ends, ball valves, solenoids and all other ancillary equipment. Backwash valve: An approved backwash prevention valve is to be located at the primary water source for top up valves to rainwater tanks (where applicable).

Irrigation system to be supplied from rainwater tanks as nominated on the Hydraulic Engineer's plans with town water top up system.

Chemical root control: Provide standard chemical root inhibiting chemical cartridge. These are to be industry standard, in-line replaceable cartridges located for easy access for replacement cartridge installation.

Automatic Controller: Provide automatic 2 week timer with hourly multi-cycle operation for each zone as noted on the irrigation areas plan on sheet 2.

Performance: It shall be the Landscape Contractor's responsibility to ensure and guarantee satisfactory operation of the irrigation system. The system is to be fit for the purpose and should utilize sufficient solenoids to provide for the varying watering requirements of landscape areas to allow all plants and lawn areas to thrive and attain long term viability.

Testing: After the system has been installed to the satisfaction of the project manager, the installation shall be tested under working conditions. Acceptance of the installed plant and equipment shall be subject to these being satisfactory.

Warranty: A twelve month warranty is to be provided in writing by the Landscape Contractor, which shall commit the Landscape Contractor to rectify the system (the items they have installed) to the satisfaction of the project manager or nominated representative. This will apply should any fault develop, or the capacity or efficiency fall below that guaranteed, or should the discharge or pressure be inadequate, or should defects develop in the filter unit or control heads, or any blockages that may develop in the system.

Approvals: The Landscape Contractor is to liaise as necessary, to ensure that the irrigation system conforms with all Water Board, Council and Australian standards (AS).

General installation notes

1. Site preparation: Any existing trees and vegetation to be retained shall be preserved and protected from damage of any sort during the execution of landscape work. In particular, root systems of existing plants must not be disturbed if possible. Any nearby site works should be carried out carefully using hand tools. To ensure the survival and growth of existing trees during landscaping works, protect by fencing or arranging where necessary. Trees shall not be removed or lopped unless specific written approval to do so is given or is indicated on plan. Storage of materials, mixing of materials, vehicle parking, disposal of liquids, machinery repairs and refueling, site office and sheds, and the lighting of fires shall not occur within three (3) metres of any existing trees. Do not stockpile soil, rubble or other debris cleared from the site, or building materials, within the dripline of existing trees. Vehicular access shall not be permitted within three (3) metres of any tree.

2. Soil preparation: All proposed planting areas to be deep ripped to 200mm (where possible) and clay soils to be treated with clay breaker. Apply at least 200mm depth good quality garden soil mix to all garden planting areas. To comply with AS 4419 Turfed areas to be Soft Leaf Buffalo or Soft Leaf Buffalo to be laid over 150mm good quality turf underlay over existing soil which is to be deep ripped to 200mm depth prior to installation. To be worked in with rotary hoe except where tree root damage would otherwise occur. In such situations care to be taken to hand cultivate in any area where existing tree roots exist to preserve health of trees and to comply with the requirements of the Arborist's report. Where planting is to occur in existing soil profiles ensure soil conditioners and composts worked into the top 200mm profile. To comply with AS 4454:1999.

3. New plantings: Newly planted trees and large shrubs should be secured to stakes with hessian ties to prevent rocking by wind. Planting holes for plant material should be large enough in size to take root ball with adequate soil to take back filling of good quality planting mix. (Please note mature heights of planting as shown on planting schedule can vary due to site conditions, locations in constricted deep soil over slab planters and so forth) Also shallow soils in certain locations may affect planting heights. Nominated heights for plantings in raised planters over slabs are nominated as less than their normal expected heights in acknowledgement of the contained soil environment. For other deep soil tree heights are subject to particular site conditions, and intended hedging or pruning for functional requirements such as available planting width, intended access under branches and solar access.

4. Planter boxes & waterproofing: All slab areas to be waterproofed and 'Atlantis' drainage cell installed with geotextile fabric. Refer Engineer's details for structural details for all planter box construction. All internal planter slab levels to fall to drainage outlets as detailed by Engineer. Ensure min 50mm cavity between planter box and building wherever planter joins building with drainage provided. Keep cavity clear of debris by providing capping row butted against building. Exterior finishes as per Architect's detail. Ensure base of cavity is able to drain via drain outlet points in event water seeps into cavity so as to not build up against building wall. Containers to be at height as indicated on Architect's drawing. All planting containers to be the following:

- Waterproofing to Engineer's specification and construction details
- Impermeous waterproof membrane along base and to continue up to top of soil level of containers
- 'Atlantis' drainage cell (or engineers specified equivalent) at base to be connected to drainage system of development.
- Planter box soil mix or equivalent to comply with AS 4419 and AS 3743
- Contractor to install all planter box finishes after other site works are completed to ensure no deterioration of waterproof membrane. Contractor to be responsible for the integrity of the waterproofing of the planter boxes
- All planter boxes are to have automatic dripline irrigation system. Connecting pipes to be installed in slab structures prior to slab pour.

5. Mulching: All planting areas to be mulched with a minimum 75mm thick cover of recycled hard wood chip mulch and then all plant areas to be thoroughly soaked with water. To comply with AS 4454

6. Fertiliser: All planting areas to be fertilised with 9 month NPK slow release fertiliser.

7. Staking: To those plants indicated on the planting schedules provide: hardwood stakes as nominated and driven into ground to a depth able to achieve rigid support.

8. Lawn edging: All ground level garden beds adjacent to site boundary or paved areas to have 150mm raised concrete edging as nominated on the plans.

9. Turfing: Turfed strip areas to be Soft Leaf Buffalo or Soft Leaf Buffalo 'shademaster' to be laid over 100mm good quality turf underlay over existing soil which is to be deep ripped to 200mm depth prior to installation. 300mm soil underlay over slab areas as per detail 7 sheet 4

10. Structural: All structural details whatsoever Engineer's details.
