This development sounds like a good contribution to the area as it will provide worthwhile accommodation to the older generation.

The president has been set on Brighton Street with sep 55 development already established.

The proposed development is not as high as the existing houses on the site so will not overshadow the neighbouring properties as much as the current houses.

The proposed development has 3 car spaces per unit so no problems with parking issues and visitors to the development don't have to take up street parking.

So all good!!!
