**RE: DA2023/1289 - 1112 - 1116 Barrenjoey Road PALM BEACH NSW 2108**

The proposed placement of the new bus shelter I feel will be very dangerous for multiple reasons.

We went through a whole rigmarole to get the pedestrian crossing moved so commuters would use it and now it will again be in the wrong position and commuters will cross dangerously at the bottom of the hill. Sometimes they are running for the bus and it can be really scary to watch. They will run straight out onto the road.

There are 5 driveways on the proposed bus stop site. It is already so hard for us to back out with the car park exits, people speeding down the hill after a blind corner and people crossing. With a bus shelter and people waiting also filling this space I fear that someone would be seriously injured. It is a car accident waiting to happen.

The cars that race down here at all times of the day and night and the motor bikes that the council are aware of all create dangerous obstacles that we must navigate to enter and exit our properties. To add commuters, and the bus shelter would be disastrous.
