RE: DA2022/0279 - 48 Johnson Street FRESHWATER NSW 2096

There are no houses in Johnson Street Freshwater with basements. If this house building goes ahead it will set a precedent which is likely to cause problems with the very old houses which are the majority of houses in this street.

There is also a problem with the water table being changed to properties downhill of this basement and how much more water will flow downhill and cause water damage to existing houses and properties.
