RE: DA2022/0985 - 9 Ozone Street FRESHWATER NSW 2096

From the submission it is not clear how the current lot will be subdivided and where the new driveway, services, etc will be to service the new subdivided lot. Looking at the previous development application (DA2020/1255) and current works in progress, it is not clear where a new driveway can be constructed to access a separate new lot (presumably the eastern side of the current lot). The notification map submitted just shows the outlines of the current lot, not what the new subdivided lot and shared driveways will look like. Could you please share how the lot will be divided and where the new driveway/s will be.
