RE: REV2021/0006 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

In regards to DA-REV2021/0006 I strongly object this DA has already been refused twice and hopefully this is the last time .

A large construction like this development will destroy the habitat of protected fauna and a large number of irreplaceable mature trees.

Also it will pollute downstream for the freshwater of Manly Dam and hence
Deadly consequences for the Climbing Galaxias fish, via Curl curl creek

It is bushfire prone land.

It affects the public amenity for the current residents

The development is on Crown land that should protect and restore the precious rare biodiversity of Manly dam and surrounds not developed and destroy it

There are many other options for developments and this would set a terrible precedent on Manly Dam which has been protected and goes against the plan of Management 2014 for MWWMSPP which proposes surrounding Crown land be added to the Park and not developed
For future generations to come I implore you to acknowledge the value of this pristine environment and to protect it

Kind regards

Yvette Eunson
