RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

I'd like to see before development that the RMS and Transport NSW + Developers propose a Entry and Exit point that utilize the great work that has been done on Warringah road and Forestway to reduce traffic on the Forestville back streets. Its crucial that we keep down the flow of traffic in Grace Street/ Deakin Street/ Bentley Avenue and Brown Street, which already sees a large traffic build up. It would simply be crazy not manage traffic via the roads that were purposely built to carry traffic away from our back streets. Matt
