**RE: Mod2021/0816 - 8 Forest Road WARRIEWOOD NSW 2102**

The addition of 81 dwelling and the traffic of 2 cars per dwelling (160 cars) would create an even more congested traffic flow. This would be an impossible situation if we had again a situation where a bushfire swept down from Ingleside and everyone was trying to evacuate from the business parks in Jubilee Ave as well as Warriewood Grove. Traffic is at a standstill everyday between 4-5pm as people go home, but during a bushfire emergency we would all be literally running for our lives as the traffic would be stopped. The council would be risking the lives of the residents and the Land and Environment Court also found that there was significant risk due to fire, but that it was the council who had the final say on whether they were happy to put our lives at risk.

I would oppose this development in it's current form so my family is not put at significant risk.
