RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

We are strongly opposed to the development proposal. As a family with young children we are concerned about the potential health impacts on children in the community. Particularly with the proximity to North Curl Curl Public School which is in clear breach of Department of Education policy and standards.

In addition the tower will impact the existing recreational clubs and grounds. The community members that use these facilities will be impacting and also exposed to potential health risks arising from the proposed development.

We do not see how the potential health risks or impact on community clubs and facilities outweigh the telecommunication benefits for the community and therefore this proposal should not be approved.
