RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

I have lived here for 20 years and the traffic is getting worse every day. First up the contractors and people on the Warringah Road works are totally incompetent and inefficient and the job is taking over twice as long as was proposed. A lot of traffic diverts to rat runs including Brown Street, Bentley avenue and Deakin Street, especially in the mornings and evenings making local travel for local residents very difficult. These rat runs include Grace Avenue, Altona Avenue. At least on Grace Avenue AND Deakin Street have single lane traffic reduction devices and speed humps do slow and discourage traffic a little bit. Bentley Ave has nothing . only residents cars parked on both sides of the road which help a little bit in discouraging non local traffic. This ridiculous state of affairs should NOT be allowed to continue and I suggest as a minimum the installation of a single lane no passing traffic device to be installed in Bentley Avenue, plus signs "local traffic ONLY. We get horns tearing down the road at high speed, noisy exhaust and this needs to be policed to a point where noisy cars are impounded and crushed if the idiot drivers can't obey the laws regarding noise.

How about doing something to reduce this growing menace in our once pleasant neighbourhood?
