**Subject:** DA2024/1216 - Support for North Harbour Marina

Dear Council,

I support the North Harbour Marina proposal under DA2024/1216, as it brings much-needed improvements to the area without negatively impacting the environment. The removal of old swing moorings and the addition of a safe navigation channel will help ease congestion and improve waterway safety.

By keeping the marina upgrades within the existing footprint, the proposal ensures that new facilities, such as kayak and dinghy storage, provide practical benefits without unnecessary expansion. These thoughtful changes will improve access, safety, and functionality for the many people who use North Harbour.

I encourage the council to approve this well-considered proposal.
