RE: DA2019/1260 - 29 North Avalon Road AVALON BEACH NSW 2107

I have been a resident of Avalon my entire life, I was born and brought up here together with my brother. My parents started their life here 67 years ago. My husband and his family have also grown up here as well and together we have brought up our three adult children. I have seen changes over the years to Avalon, some good some not so good. Avalon has evolved obviously, as time changes everything, but I can't sit back and watch this sort of development in Avalon happen. If this gets approved Avalon as we know will no longer be the place to relax and enjoy the laidback lifestyle. This development will turn our community into another concrete jungle suburb. The site in question is a residential neighbourhood not zoned for these sorts of buildings. There has been no respect for the many neighbours whatsoever taking away their privacy and tranquility of their homes. Not to mention the native environment that will be destroyed. Trees, Animals, landscape, nothing will replace the history of this environment. It is simply inappropriate for this neighbourhood, and if it gets approved will lead more of these developments. Please consider the local community with respect to the history of this incredible location and say no to the developers who've no connection to our community.
