

## Natural Environment Referral Response - Riparian

<b>Application Number:</b>	DA2025/0552
<b>Proposed Development:</b>	Construction of a secondary dwelling
<b>Date:</b>	24/06/2025
<b>To:</b>	Anaiis Sarkissian
<b>Land to be developed (Address):</b>	Lot 8 DP 24003 , 14 Hudson Parade AVALON BEACH NSW 2107

### Reasons for referral

This application seeks consent for the following:

- All Development Applications on land, and located within 40 metres of land, containing a watercourse, or
- All Development Applications on land containing a wetland, or located within 100m of land containing a wetland,
- All Development Applications on land that is mapped as “DCP Map Waterways and Riparian Land”.

And as such, Council's Natural Environment Unit officers are required to consider the likely impacts on drainage regimes.

### Officer comments

This application was assessed in consideration of:

- Supplied plans and reports;
  - Northern Beaches Water Management for Development Policy (WMD Policy);
  - Relevant LEP and DCP clauses;
  - State Environmental Planning Policy (Resilience & Hazards) 2021;
- NECC Catchment raise no objection, subject to adherence to the outlined conditions.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

### Recommended Natural Environment Conditions:

## CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

### Water Quality Management

The applicant must install a filtration device (such as a sediment control pit/absorption trench/level spreader) that captures organic matter and coarse sediments prior to discharge of stormwater from the land. All stormwater treatment measures must make provision for convenient and safe regular

inspection, periodic cleaning, and maintenance.

Details demonstrating compliance are to be submitted to the Certifier for approval prior to the issue of the Construction Certificate.

Reason: Protection of the receiving environment.

## **CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK**

### **Installation and Maintenance of Sediment and Erosion Controls**

Council proactively regulates construction sites for sediment management.

Sediment and erosion controls must be installed in accordance with Landcom's 'Managing Urban Stormwater: Soils and Construction' (2004) and the Erosion and Sediment Control Plan prior to commencement of any other works on site.

Erosion and sediment controls are to be adequately maintained and monitored at all times, particularly after periods of rain, and shall remain in proper operation until all development activities have been completed and vegetation cover has been re-established across 70 percent of the site, and the remaining areas have been stabilised with ongoing measures such as jute mesh or matting.

Reason: To protect the receiving environment.
