CONCLUSION

The proposed modifications will not result in unreasonable impacts on solar access of the subject site. The development will retain north-east facing terraces and living areas which will retain adequate solar access. The proposed modifications will provide additional solar access to the proposed Unit 1 bedroom.

The subject site and neighbouring dwellings will continue to receive a minimum of 3 hours of sunlight between 9am and 3pm on June 21st. Overall, the proposed modifications will not result in unreasonable overshadowing impacts and neighbour dwelling is anticipated to retain adequate solar access to north-eastern living areas/private open space.
