**Subject:** Objection to proposed development

Re DA2020/1758

Good morning,

As a local resident I object to this proposed development due to increased traffic flow in our already car populated suburb. I have two children who attend the local school, my eldest started in 2015. Since then I have seen a huge increase in cars parking around the school area, the streets are narrow and become tighter with cars meeting from opposite directions, this is combined with adults and children attempting to cross the road.

The surrounding streets are constantly filled with parked cars during working hours. With 6 car spots allocated for parent drop off within this proposed development, excess cars will also be forced onto our already busy local streets.

Kind regards,

Louise Harvey
