RE: DA2021/2257 - 75 The Corso MANLY NSW 2095

Note: I request that my personal information is not made public.

I strongly oppose this application. Even though the heritage report commissioned by the applicant suggests the property does not meet the narrow definition of a heritage item, anyone who looks at the facade can see it has a unique character and aesthetic which has value. As council looks to define and protect what makes this suburb so special, approving the destruction of part of the historic beach front street scape would be such an irreversible loss. It's these charming old facades that make Manly Manly - it's one of the reason visitors from around the world come here. Regardless of whether building meets long outdated and too narrow definitions of heritage value. Please don't allow this charming and historic building to be torn down for another cookie cutter building.
