Subject: DA2024/1316

Dear Council,

I am writing in support of DA2024/1216 for the proposed improvements to North Harbour Marina. These upgrades will modernise facilities, improve safety, and enhance access for a wide range of water users.

The introduction of new kayak and dinghy storage will provide a much-needed solution for smaller craft, while the removal of outdated swing moorings will create a more organised and efficient layout. The planned 50m-wide navigation channel is a significant improvement, ensuring safer passage through the harbour and reducing unnecessary congestion.

This proposal carefully considers both environmental and community concerns, and I encourage its approval.
