**RE: PEX2014/0004 - 9 Howard Avenue DEE WHY NSW 2099**

The height of the towers is too high for Dee Why, it should be at most 12 floors high taking into account the elevation on the other side of the road and that there will be a 9 floor building there. The height of the towers is too high for the current buildings in Dee Why and will set a dangerous precedent for future buildings taking away from the beach and natural environment at Dee Why,
