RE: DA2021/1522 - 189 Riverview Road AVALON BEACH NSW 2107

The cutting down of protected canopy tree species for this development, that are feed trees for endangered animals in the area, is completely unacceptable. Removal of there trees does not just effect the animals on the property bounds, but within the entire area, as it prevents their movements, leading to increased animal v. vehicle deaths, it destroys their food sources and nesting sites. These established trees cannot be replaced with replanting as the damage to the ecosystem is done as soon as they are cut down. This development should not go ahead.
