RE: DA2021/0212 - 5 Skyline Place FRENCHS FOREST NSW 2086

Obvious increase traffic on local roads.

Continues noise level during construction both day & night as we are experiencing at this moment , after already enduring the road works for years.

Local wildlife affected due to culling of the trees & bushes again already happening at this moment.

After the rezoning was confirmed previously , it clearly stated no development would be happening in the commercial area and here we are having a over 55s development .Where does it all stop, there does not seem to be any care factor for the local rating paying residents.
