IN ORANGE SEDIMENT CONTROL FENCE

1 Sediment & Erosion Control plan

A108 1 : 200

SILT FENCE DETAIL & NOTES:

1. Silt fences should be installed on a site as early as possible, ideally before excavation or other soil disturbance begins
2. Install a silt fence down-slope from the construction area, always along the contour (curve) of the slope you are protecting – don't install in straight lines
3. Significant downward slopes should use the curved installation method
4. Stockpiles of soil and building materials must be contained by a silt fence
5. Leave the silt fence in place until vegetation is established, or sediment is stabilised
6. Silt fencing requires frequent inspections, particularly after each runoff event (storm, rainfall etc.), to check for damage or clogging of the fence by silt and debris
7. Silt fences are best used for sites where the soil disturbance area is up to 0.5 of a hectare

DISTURBED AREA

UNDISTURBED AREA

Do not scale from plans. All dimensions and levels shown on plan are subject to confirmation on site.

2 WASTE MANAGEMENT PLAN

A108 1 : 65

WASTE MANAGEMENT PLAN

CONTRACTORS WILL BE RESPONSIBLE FOR ENSURING:

1. Dedicated safe pedestrian access is, at all times, to be provided in front of the site.
2. Demolition and construction will be minimised and separation, reuse and recycling of materials will be maximised.
3. Demolition will be managed to ensure air and water borne pollutants such as, dust, odour, liquids and the like are minimised.
4. Demolition will be managed to minimise site disturbance to the surrounding area.

KEY ACTIONS :

1. Install Sediment Barrier on downslope side of property
2. Stock pile demolition materials on level sections at rear and front of existing dwelling .Separate waste, from reuse and recycle materials.
3. Clean and Clear footpath and roadway as required
4. Limit Disturbance when clearing
5. Wash Equipment in Designated area
6. Store all hard waste & litter in a designed area
7. Restrict vehicle movements and use the driveway only when possible.
8. Preserve as much grassed area as possible.
