Subject: TRIMMED: DA 2024/0487 (139 Lagoon St Narrabeen)

Attn Anne-Marie Young

Good Morning

My wife and I live at 141 Lagoon St Narrabeen on the northern side of the above application . I submitted an email last Friday explaining that we were away until the weekend before last and did not read your notification letter until that time .

We have serious concerns as to the high risk the proposal has to create subsidence in our driveway and have now received an engineers report confirming our fears . The report is now with Will Fleming , town planner who is preparing a submission to council who will attach the engineers report . We trust no decision will be made on the application until both reports are presented to council .

This morning I spoke to two neighbours who were included in the notification map but who did not receive any communication from council . They were both very concerned that they had not been notified.

Thank you for your time .

Regards

Tom Webster
