RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

I understand that this development will involve a 73% increase in parking spaces this implies an equally large increase in traffic. But Transport NSW has refused permission for traffic from the new development to make a right hand turn onto Forest way to get to Warringah Rd which means the traffic will exit via Grace street and then use local streets to access Warringah Rd via Brown street. This would be a nightmare for residents. During the upgrade of Warringah Rd we had this increased traffic flow and I found myself in a traffic jam before I left my driveway! Please do not allow this.
