RE: DA2021/1164 - 521 Barrenjoey Road BILGOLA BEACH NSW 2107

I have grave concerns about this land being developed and vital environmental areas. The loss of canopy cover has exponentially increased over the last year and the whiplash to our native wildlife has been felt. We have constant possum fights and birds looking for trees in our area which backs onto remnant rainforest. Our council needs to step in and preserve our environment. As a life long resident it has been disheartening to see people move here and develop and immediately cut down what makes our area special. Please value the ecological importance of this site. Obviously cars off narrow winding roads doesn't help either, but I'd like to focus on environmental issues in my complaint of this particular site.
