RE: Mod2018/0585 - 39 Frenchs Forest Road East FRENCHS FOREST NSW 2086

The new plans are substantially the same as those I objected to in 2015. My concerns then, and they remain the same, are about noise from the development disrupting the conduct of sleep studies in the adjacent Peninsula Sleep Clinic. We conduct sleep studies (for which quiet is an obvious necessity) from approximately 2200 Monday to Thursday nights, finishing usually at 0700 at present, though we may include Friday nights in future. I am concerned about the presence of the loading dock directly opposite my Sleep Clinic. Any operation in that area after 2200 weeknights would be a threat to my business. In addition, any extension of the existing noise curfew past 2300 on Thursday nights would be a threat to the successful conduct of sleep studies, which are the lifeblood of the Clinic.
