**RE: DA2020/0393 - 28 Lockwood Avenue BELROSE NSW 2085**

This development exceeds height restrictions. The density will make an already dangerous corner worse, as traffic already backs up onto Lockwood Parade. Due to vehicles entering and leaving the Petrol station, shops, theatre etc. Pedestrians will be put in greater danger. School children use these crossings every day. The green space footprint is reduced. There is currently a kindergarten adjacent to the site. The children may be exposed to hazardous waste as the Glenrose shop site was contaminated by chemical waste. It does not comply with setback & NSW planning Adg
