

Arboricultural Impact Assessment Report – **NOT REQUIRED**

Geoff Burton (AQF Level 5 Arborist/Horticulturist) of Costal Care Horticultural Services has previously provided arboricultural advice and regular maintenance of the three significant trees at 546 Pittwater Road, North Manly.

He was approached regarding this development and confirmed that an Arboricultural Impact Assessment was not required as the proposed works were further than 5m from the significant trees on the site. Additionally, the nature of the root system of the Angophora is such that is well above the proposed works.

He is happy to be contacted at the below, should further clarification be sought.
