DS2024/1618 - Waste water - swimming pool

Hi Stephanie,

For the proposed swimming pool at Lot 375/ Joolah Road, Duffys Forest, NSW there will be **no waste water** as we will utilise a pleated cartridge filter system that does not require any backwash.

Please see attached an example from Mid Coast Council (Cartridge Filter)

The pleated element shown is cleaned by hand and then replaced every 12 months – please see our product attached.

The above-mentioned solution completely satisfies requirements in your letter dated 9 January 2025.

Kind Regards,

Steven Dowdall

Managing Director
