RE: DA2021/1508 - 882 A Pittwater Road DEE WHY NSW 2099

Having looked over the plans for this development I am pretty gobsmacked that such a plan can even be considered. At present the infrastructure around Dee Why, and in particular the central village is already at breaking point without adding in additional developments - how can we even consider a building that doesn't have on site parking? Not only this but 9 stories? Are we not going to be happy until our entire beautiful suburb has been overrun by sky high towers that block out the sun, built by developers that don't give a damn about the area and the impact their work has on the local community? Also, more building work? Can't we just have a break? So far we have been stuck with that site on the corner of oaks and Pittwater for god knows how long, we've had the works on the corner of Pittwater and St Davids Ave and so much more!
