RE: DA2018/1481 - 1 / 0 Veterans Parade NARRABEEN NSW 2101

My family and I object to this unacceptable proposal. We have lived in close proximity to the RSL 'War Vets' for many years and patiently weathered the significant changes brought about by the constant development at the RSL 'Village'. We have seen our once child safe street become an increasingly busy access route to the 'War Vets' and have never complained. However, this proposal has us seeing red! There is already a telecommunications tower located within the Collaroy Plateau and Wheeler Heights general area and we have no need for a second! There is absolutely no benefit to the many families living in proximity to the proposed new tower. It seems the sole reason for this tower, is to service the new development of the 'Dardanelles' and if so, should be located down in that area and not up by young families and a stones throw from a primary school! I am very concerned about the future health issues that may well affect those that could be living within close proximity to the proposed tower. Particularly young families. It is a valid concern given that the microwave emissions from mobile phone towers are known to potentially interfere with the body's own EMFs and can cause health issues not limited to but including: headaches, cardiovascular stress, birth defects, fertility issues and Cancer clusters. Given the fact that time has a way of eventually unveiling the truth of harmful exposures and forces those that inflicted this exposure to take responsibility, is the Council really prepared to weather the storm that may happen down the track - merely to accommodate the ever-expanding RSL 'War Vets'. I believe alternatives (that I am aware do exist) should be sought.
